

Installing MCL on your MC3000

To make your new MC3000 device MCL-ready, simply follow the 5 steps to install the MCL-Client.

1. If it is not already installed on your PC, you must download and install ActiveSync. The latest version of ActiveSync can be installed from the following website:
<http://www.microsoft.com/windowsmobile/downloads/activesync38.msp>
2. Establish a “guest connection” with your MC3000. When this is done, you will see your device appearing in My Computer.

3. Download the MCL-Client V3 for the MC3000 from the Download section of our Symbol-dedicated website (<http://symbol.ftp.mcl-collection.com/>).
4. **On your PC**, click on Mobile Device in My Computer as shown above, open the Temp folder, then simply drag-and-drop the downloaded “.cab” file over into this Temp folder.
5. **On your MC3000 device**, find the transferred file in the Temp folder, and double-click on it. It will unfold, and your MCL-Client will be successfully installed. An MCL Icon has now been added to your device desktop. Double-click to Launch!
